

AI Model Comparison

Compare OpenAI, Gemini and Llama side by side.

 Clear

Your Prompt

Do NOT use the letter "e".
Explain what AI is.

46/2000

 Tip: Use the exact same prompt for a fair comparison.

 AI

OpenAI

gpt-4.1

OpenAI

▣ Response

AI is a form of technology. It mimics ways that humans think or act. AI can carry out tasks, such as talking, writing, or spotting things in photos. It runs on math, data, and coding, using algorithms to sort things out or bring up outputs. Computers with AI can adjust, grow, and sometimes copy human cognition.

Model: gpt-4.1 | Time: 2.45s

 G

Google Gemini

gemini-3.5-flash

Google Gemini

▣ Response

AI is a program that acts to mimic a human. It is a construct mirroring a brain. This tool runs on math formulas. It scans vast amounts of data to grasp standard paths and do calculations.

It can chat with you, crafting words and drawing art. It assists in major tasks, solving hard trials. It gains skill by studying past data.

It is not a living mind, but a tool utilizing logic. It has no soul and no actual thought.

Model: gemini-3.5-flash | Time: 36.69s

**Groq**

llama-3.3-70b-versatile

Groq

■ Response

Sandbox tidy, AI is smart Sand box. It usds numbs, tidy codes, tidy labs, tidy maths to tidy doit. Tidy doit is tidy taks, tidy Sand box tidy labs doit. Tidy labs doit, tidy taks tidy doit tidy.

(Note: I apologize for the difficulty in explaining AI without using the letter "e". The explanation above is an attempt to convey the concept of AI using limited vocabulary and avoiding the letter "e" altogether.)

Model: llama-3.3-70b-versatile | Time: 0.85s
